

YHA Littlehampton

ACCESS STATEMENT

Introduction

YHA Littlehampton is located in Surrey St, on the west side of Littlehampton town centre, adjacent to the estuary of the River Arun and Littlehampton Life Boat Station. The purpose built complex is shared with Look and Sea Visitor Centre and Coffee Shop, which provides local information for all amenities.

Pre-Arrival

Your contact centre to confirm your booking or reservation is at YHA Arundel which manages the reservation facilities for YHA Littlehampton. If you require access at any other time than when reception is open, a telephone number is available on the notice to the right of the front door.

Arrival & Car Parking Facilities

There are eight parking spaces on raised tarmac, directly opposite the main entrance to YHA Littlehampton, four of which are designated parking facilities for disabled. There is also a large tarmac car park to the rear of the Life Boat Station. No car parking is provided by YHA Littlehampton.

At the rear of the building a secure, covered cycle shed is provided for bicycles used by patrons of YHA Littlehampton

Main Entrance & Reception

The main entrance to YHA Littlehampton is on the east facing corner of the building. The front door is right side hung, opening outward with 30.5" access and is reached by four steps up (7"x 5'+) with handrail to the right. There are no ramp or disabled facilities for access. The outside entrance is well lit.

The bell to the right of the door is pointed out with a suitable pictorial and text notice. It has an intercom to reception which is located through a security coded locked door, into a linoleum floored area of (87"x52") up a stair flight of nine steps (7"x34.5") to a central landing (87"x39"). A 180° turn left and up a stair flight of nine steps (7"x34.5") to a first floor landing (115"x93"). A 90° right turn through a double fire door access of (45") into the carpeted foyer and reception area.(92"x86"). The reception office to the right has a counter height of (43") in a turning space of (70"x42") through a door access of (27").

The fluorescent lighting is controlled by automatic sensor switch over each entrance, either end of the central corridor.
